

Fuel POS

Fuel POS, helps you to manage all aspects of your fuel and retail business. It combines an easy-to-use touchscreen interface with powerful management and analytical software tools. It allows you to connect seamlessly with all other systems on your service station including dispensers, indoor and outdoor payment, CCTV, tank level gauges, pole-sign and back office. This level of integration makes life easier, helping to provide you and your staff with more time to better serve your customers. Fuel POS is designed to interface to a range of products via internationally recognized standards to provide you with a set of integrated systems that drive better business results. Fuel POS helps you to manage your overall business more effectively. The sophisticated reporting features help you evaluate where you are doing well and areas where you may be able to improve. Available reports include workforce management, shift reports, cash management, sales activities, access control and wet stock management.

Fuel POS is the industry-specialist Point of Sale solution that has been chosen by oil companies and thousands of independent service stations to help run their businesses more effectively. Fuel POS is provided with an easy to use set-up application called eMIS. This powerful and intuitive software allows quick and accurate placement of data onto your new Electronic Point of Sale (EPOS or POS). Setting up of forecourt fuel grades, tanks and pumps is configured swiftly; shop article details like description, department and barcodes are simple to add. Smart wet stock management capabilities help reduce fuel losses and improve compliance. Fuel POS helps you manage your fuel as easily as you manage your stock. Fuel POS provides you with a secure payment platform that covers traditionally accepted payment methods such as Credit/Debit/Fuel Cards.
